

ARSALAN FIROZ

Backend Software Engineer

Bengaluru, India | +91 9060303684 | arsalanfiroz.work@gmail.com | linkedin.com/in/arsalan-firoz

SUMMARY

Backend Software Engineer with **4 years of experience** designing and scaling high-throughput backend systems for consumer platforms. Experienced in **Node.js, TypeScript, Data Structures & Algorithms, REST APIs, microservices, MySQL, MongoDB, Redis, AWS, Docker, and Kubernetes**, with production experience across **payments, promotions, rewards, fraud prevention, and reporting systems**. Built and scaled services supporting **50+ domains across 10+ countries and millions of daily transactions**, with a strong focus on scalability, reliability, performance & system design.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL

Backend: Node.js, Express.js, REST APIs, GraphQL, Microservices, FastAPI, WebSocket, JWT, OAuth, Elasticsearch

Databases: MySQL, MongoDB, Redis, NoSQL, PostgreSQL

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins pipeline, CI/CD, GitHub Actions

Architecture: Distributed Systems, Event-Driven Architecture, Apache Kafka, Message Queues, Design Pattern

PROFESSIONAL EXPERIENCE

Software Engineer - FPLE SDN BHD

May 2024 – Present

Bengaluru, India

- Designed and scaled backend services supporting **50+ domains across 10+ countries**, processing **millions of daily transactions** across consumer-facing platforms.
- Built scalable **promotions and rewards services** supporting cashback, instant rebate, and loyalty programs, contributing to a **60% increase in new-user registrations** and **75% improvement in participation**.
- Contributed in **payment gateway integration** with millions of transactions improving **payment success rates by 30%**.
- Developed high-performance **REST APIs and financial-service integrations using Node.js and TypeScript**, supporting production-critical transaction workflows.
- Implemented fraud-prevention mechanisms including **OTP verification, rate limiting, and IP whitelisting**, reducing fraudulent transaction attempts by approximately **95%**.
- Optimized **MySQL and MongoDB** queries through production log analysis and database optimization, reducing transaction failures by **50%** and improving database response times by **35%**.
- Managed production deployments and **CI/CD pipelines using Jenkins and Docker** with minimal downtime.
- Contributed to **architecture and system-design discussions** for distributed backend systems, helping design scalable solutions for increasing traffic and transaction volumes.
- Mentored junior engineers through **code reviews and technical knowledge sharing**, contributing to improved development quality and velocity.
- Hands-on experience building and developing with LLMs for code generation, debugging, automation or tooling.

Software Engineer - Cognizant

Jan 2022 – Apr 2024

Bengaluru, India

- Progressed from **Junior Software Engineer to Software Engineer**, developing and maintaining backend modules and **REST APIs** in collaboration with senior engineers.
- Developed optimized **SQL queries** and contributed to database schema design to improve data retrieval efficiency.
- Participated in **code reviews, unit testing, debugging, and production-oriented development**, following SDLC and Agile engineering practices.
- Used **Git and Jira** as part of collaborative software development and delivery workflows.

PROJECTS

Ticket Booking System : Event-Driven Microservices

- Designed and implemented a ticket-booking platform using an **event-driven microservices architecture** with independently deployable **Authentication, Orders, Payments, and Moderation** services.
- Implemented **asynchronous service communication, JWT authentication, Kubernetes deployment, Ingress, load balancing, and CI/CD automation** to support scalable and independently deployable backend services.

CERTIFICATIONS

AWS Certified Solutions Architect -Associate, Oracle Cloud Infrastructure 2021 Certified Architect Associate

HackerRank: SQL (Intermediate), REST API (Intermediate), JavaScript (Intermediate), Software Engineer

Postman API Fundamentals Student Expert. Linux Foundation LFD103: Beginner's Guide to Linux Kernel Development

Claude Code in Action (Anthropic), Generative AI Fundamentals (Databricks), GitHub Copilot Beginner to Pro (Udemy)

EDUCATION

Bachelor of Technology (B.Tech.) - Computer Science and Engineering

University of Allahabad, J.K. Institute of Applied Physics and Technology
